Smart Integration

For Projects requiring more than just design — real functionality

Led by Guillaume and our full team

Headline: Designed for daily performance—not just visual appeal.

You want more than a beautiful space—you want a garage that works seamlessly every day.

We integrate the systems that bring your space to life.

- Technical integration aligned with your design
- Planning of plumbing, electrical, HVAC, and ventilation
- Smart features, media setup, and built-in systems

Custom add-on tailored to your project

Typically integrated within Design & Setup or Full Transformation

Service Fee starts at: \$3,500

Fully credited when you move forward with a signed project contract

We plan every system upfront to avoid costly changes and ensure seamless integration.

SMART INTEGRATION

Headline:

Technical Integration — Designed for Performance, Comfort, and Everyday Use

This service transforms your garage into a fully functional space by integrating all essential systems from the start.

No guesswork. No costly adjustments later.

What you get

- Technical integration aligned with your design
- Planning of plumbing, electrical, HVAC, and ventilation
- Built-in storage, media setup, and smart features
- Coordination with qualified professionals
- Technical layouts prepared for implementation

How it works

Systems are planned during the design phase.

Integration is coordinated before any work begins.

All components are designed to function seamlessly together.

Investment

Can be added as a standalone upgrade if needed

- Technical feasibility validated before implementation
- Clear scope and system requirements defined upfront
- Coordination planned prior to execution

Custom add-on based on your systems and integration needs.

Typically included within Design & Setup or Full Transformation

Service Fee starts at \$3500

Fully credited when you move forward with a signed project contract

Deposit Structure

Included within your main project deposit structure.

(Defined separately only if requested as a standalone upgrade)

Additional Work

Any additional systems, upgrades, or changes in scope will be clearly defined and quoted separately.

Use of Designs:

All technical layouts and integration plans remain the property of Garage à la Carte and are provided for your personal project use only.

If you choose to work with another contractor, a separate usage or release agreement may be required.

Permits & Regulations

Some systems may require city or county permits depending on the scope.

We guide you through requirements and coordinate with the appropriate professionals when needed.

Delivery Area

Included within 20 miles of Orlando.

Extended zones are available with a mileage fee.

Statewide projects available upon request.
