

WEBSITE PROJECT DETAILS & CONDITIONS

We set clear expectations from day one, plan carefully, and guide your project from idea to completion — depending on the level of service you choose.

These guidelines ensure a smooth, transparent, and well-managed experience.

By engaging with Garage à la Carte, you agree to these project guidelines unless otherwise defined in a written agreement.

1. Free Estimate

We begin with a consultation to understand your space, your goals, and the level of service that best fits your project.

Your estimate is an initial evaluation and may evolve based on final selections, site conditions, and project details.

Estimates are typically valid for a limited period due to potential changes in material costs and availability.

2. Project Validation

A project is considered ready once the following are clearly defined:

- Selected service level
- Confirmed layout and design direction
- Estimated budget and main components

Once validated, we move into planning and execution.

3. Scope of Work & Service Levels

Each service includes only what is clearly defined within the selected level:

- Design Blueprint** → Planning and visual design
- Design + Delivery** → Design, sourcing, and preparation
- Full Transformation** → Full coordination and execution
- Smart Integration** → Technical systems and upgrades

Any request outside the selected service is handled as a project adjustment.

3B. Design Visuals

Our 3D visuals and renderings are designed to help you clearly visualize your future space and make confident decisions.

They represent the overall design intent, layout, and atmosphere of your project.

As every garage is unique, small variations may occur in the final result due to materials, lighting, site conditions, or product availability.

Our goal is always to stay as close as possible to the approved design while adapting to real-world conditions.

3C. Design Approval

Before moving forward, you'll review and approve your design, including layout, materials, and overall concept.

This step ensures everything is aligned with your vision before we begin sourcing or execution.

Once approved, your project moves forward based on these validated plans.

Any changes made afterward are considered project adjustments and may affect the timeline and pricing.

We encourage you to take the time to review every detail carefully — this is your opportunity to make sure everything feels right before we build.

4. Client Responsibilities

To ensure your project runs smoothly, you agree to:

- Provide accurate information about your space and needs
- Review and approve designs in a timely manner
- Ensure access to the property for delivery or installation
- Obtain any required approvals (HOA, building management, etc.)

Utilities (electrical, plumbing, etc.) must be accessible and compliant prior to installation unless otherwise agreed.

4B. Site Readiness & Decluttering

Before delivery or installation, the garage must be fully prepared:

- Personal items removed
- Workspace cleared
- Access unobstructed

Decluttering and item removal remain the client's responsibility.

If the site is not ready, the project may be delayed or rescheduled, and additional costs may apply.

4C. Site Documentation (Internal Use)

To ensure a smooth and accurate process, we may take photos or short videos of your garage during on-site visits.

This allows our team — including Guillaume and Juliette — to capture important details without requiring additional visits, helping us plan and execute your project efficiently.

These materials are used strictly for internal purposes and remain private.

They are never used for marketing without your prior approval (see Portfolio Use section).

5. Installation & Responsibility

Execution depends on your selected service level:

- Design Blueprint → Client-managed execution
- Design + Delivery → Client installs or requests support
- Full Transformation → Installation managed by our team and partners

6. Permits & Regulations

Some projects may require permits depending on the scope and local regulations.

Unless otherwise included, the client is responsible for obtaining permits.

We provide guidance or coordination when part of the selected service.

7. Licensed Trades

When required, we coordinate with qualified and licensed professionals to ensure compliance and quality.

8. Project Timeline

Timelines are estimated and may be influenced by:

- Material availability
- Supplier delays
- Weather conditions
- Permits and approvals
- Site readiness

We communicate any updates as early as possible.

9. Payment Terms

A deposit is required to secure your project and begin planning.

The payment structure depends on your selected service and project scope and is defined during your project setup.

Typically includes:

- Initial deposit
- Progress payments
- Final balance prior to completion

No work begins without confirmed payment.

10. Project Adjustments

Any change after approval is handled as a project adjustment.

Adjustments may impact pricing, timeline, and delivery conditions, and are confirmed before moving forward.

11. Existing Conditions

We are not responsible for pre-existing issues such as structural defects, electrical or plumbing problems, or hidden damage.

If identified, solutions may be proposed as part of an updated scope.

12. Product Availability

If a product becomes unavailable, we may recommend equivalent alternatives in quality and function, subject to your approval.

13. External Factors

Delays may occur due to factors beyond our control, including severe weather, supply chain disruptions, or regulatory constraints.

We adapt and communicate as needed.

14. Delivery Area

Services are included within a standard local service area (typically within 20 miles of Orlando).

Projects outside this area are available upon request and may include additional fees.

15. Final Walkthrough

For managed projects, a final walkthrough may be conducted to ensure everything aligns with the agreed plan.

16. Cancellation

Custom work and orders may not be canceled once initiated.

Work completed up to the time of cancellation remains payable.

17. Warranty

Manufacturer warranties apply to products.

The installation warranty applies when installation is handled by our team or partners.

18. Portfolio Use

We may use project photos for portfolio and marketing purposes unless you request otherwise in writing.

Our Commitment

- Clear communication
- Thoughtful design
- Reliable coordination
- Results aligned with your expectations
